Contributing

When contributing to this repository, please first discuss the change you wish to make, this can be done in a number of ways, preferable via the set up groupchat on snapchat. Other ways of communicating a contribution can either be through email to group leader or to a microsoft teams message placed in our groupchat.

Pull Request Process

Ensure all local changes have been stashed before pull request

Code of Conduct

Our Pledge

We pledge to keep user data and messages all encrypted so that everyone who uses our application feels safe to do so. We will listen to our userbase for suggestions and changes to our application. Be inclusive to all regardless of ethnicity, gender identity, race and religion.

Our Standards

Any bugs inhibiting the ability to use key functionality of the application is not acceptable. No discriminatory language used by the developers within the application or the community. Release of private user data is unacceptable. User data and messages will all be encrypted.

Our Responsibilities

We must maintain the application so that all key functionality is working as intended. We will make sure that the application continues to work with future operating system changes. Project leaders are responsible for taking action when our standards aren't met or unacceptable language/behaviour is used.

Scope

This code of conduct applies to all who represent the community or application. Even if representatives are in a public or private space this code of conduct still applies.

Enforcement

Complaints will be reviewed and investigated by the project leader who will decide on an appropriate punishment to fit the offense. All complaints can be sent by email directly to the project leader. The Person who reported the offense must remain anonymous at all times by the project leader.
